

General Information

This document has been designed to provide teachers and students with a learning pathway through all of the Musago content. It is based on the progression of the MCA Grades, with the addition of any new lessons that have not yet been assigned to an MCA Grade.

Please note that this is a guide. None of the Musago lesson content is locked, meaning teachers can assign any lessons at anytime. However, for teachers who would prefer a framework, this may be a helpful document.

Note: This pathway does result in some back and forth between courses. This reason for this is a holistic approach to learning theory. It might be preferable to encourage students to complete courses as a whole before moving on.
